

# STURMTIGER

During World War II the German Army had to combat frequently fortified positions or urban defense centers. Due to tactical reason - the troops were at short distance to the enemy lines - artillery and air support could not be engaged. This led to the development of the "Sturm" - version of the "Tiger" heavy tank (Italeri N. 293). Onto the heavy-duty chassis the efficient and unique 38 cm mortar was mounted, which had a short range but enormous fire power. Only few units of the Sturmtiger were built and were mainly used in 1994 at the Eastern front.

**Technical Data:** Length: 6,28 m; Width: 3,57 m; Height: 2,85 m; Weight: 65 tons; Range of vehicle: 120 km; Crew: 5; Armament: one 38 cm mortar RW6, one 7,92 mm machinegun.

Während des zweiten Weltkrieges mußte die Deutsche Wehrmacht oft befestigte Stellungen oder Bunker im Stadtinneren unter Beschuß nehmen und konnte auf Grund der Nähe der eigenen Truppen nicht auf Artillerie und Luftwaffe zurückgreifen. Dies führte zur Entwicklung einer Sonderversion des Panzerkampfwagens "Tiger" (Italeri Nr. 293) mit der Bezeichnung "38 cm RW61 auf Sturm-morser Tiger". Auf das robuste Chassis wurde der effiziente 38 cm Morser montiert, der eine geringe Reichweite aber einen enormen Zerstörungseffekt hatte. Nur wenige Exemplare des Sturmtiger wurden hergestellt und Ende 1944 vorwiegend an der Ostfront eingesetzt.

**Technische Daten:** Länge: 6,28 m; Breite: 3,57 m; Höhe: 2,85 m; Gewicht: 65 t; Reichweite: 120 km; Besatzung: 5 Bewaffnung: 1 x 38 cm Morser RW61, 1 x 7,92 mm MG.

Durant la 2<sup>de</sup> G.M., l'armée Allemande devait fréquemment combattre les positions fortifiées ou les centres de défense urbains. Pour des raisons techniques - les troupes n'étaient pas loin des lignes ennemies - l'artillerie et le support aérien ne pouvaient être utilisés. Ceci mena au développement du "Sturm" - version du "Tiger" tank lourd (Italeri N. 293). Sur le lourd chassis a été monté un efficace mortier de 38 cm, qui a une courte portée mais une énorme puissance de feu. Seulement quelques unités du Sturmtiger furent construites et elles furent principalement utilisées en 1944 sur le front Est.

**Données Techniques:** Longueur: 6,28 m; Largeur: 3,57 m; Hauteur: 2,85 m; Poids: 65 t; Autonomie: 120 km; Equipage: 5; Armement: 1 mortier 38 cm RW 61, 1 mitrailleuse 7,92 mm.

Durante la 2<sup>a</sup> Guerra Mundial, el ejército alemán tuvo que combatir frecuentemente, contra posiciones fortificadas, o centros de defensa urbana. Debido a razones tácticas - las tropas se encontraban a corta distancia de las líneas enemigas - la artillería y el apoyo aéreo no podían ser utilizadas. Esto condujo al desarrollo del "Sturm" - versión del carro pesado "Tiger" (Italeri n° 293). Sobre el pesado chasis se montó el singular eficiente mortero de 38 cm., que era de corto alcance, pero tenía una enorme potencia de fuego. Únicamente se construyeron unas pocas unidades del Sturmtiger, y fueron principalmente utilizadas en 1944 en el Frente Este.

**Datos Técnicos:** Longitud: 6,28 m; Anchura: 3,57 m; Altura: 2,85 m; Peso: 65 toneladas; Autonomía del vehículo: 120 km; Tripulación: 5; Armamento: un mortero RW61 de 38 cm, una ametralladora de 7,92 mm.

Utilizar el pegamento específico para plástico (poliestereno).  
 Utilizar el pegamento y las pinturas en un ambiente aireado y lejos de fuentes de calor.  
 Para menores de 14 años es aconsejable la asistencia de un adulto.

Pegamento sólido (atòxico)  
**MODEL MASTER Ref. 03 996**

El pegamento sólido en tubo (atòxico) se extiende mediante la punta del tubo.

Pegamento líquido (tòxico)  
**MODEL MASTER Ref. 03 999**

El pegamento líquido (tòxico) se extiende con el pincelito.
